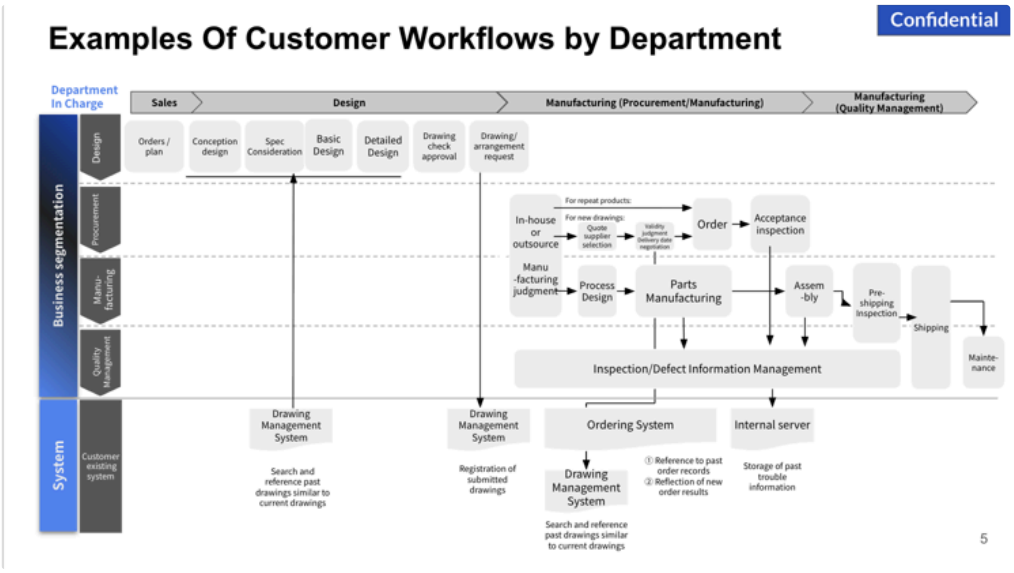
Solutions Work Sample

Your Assignment

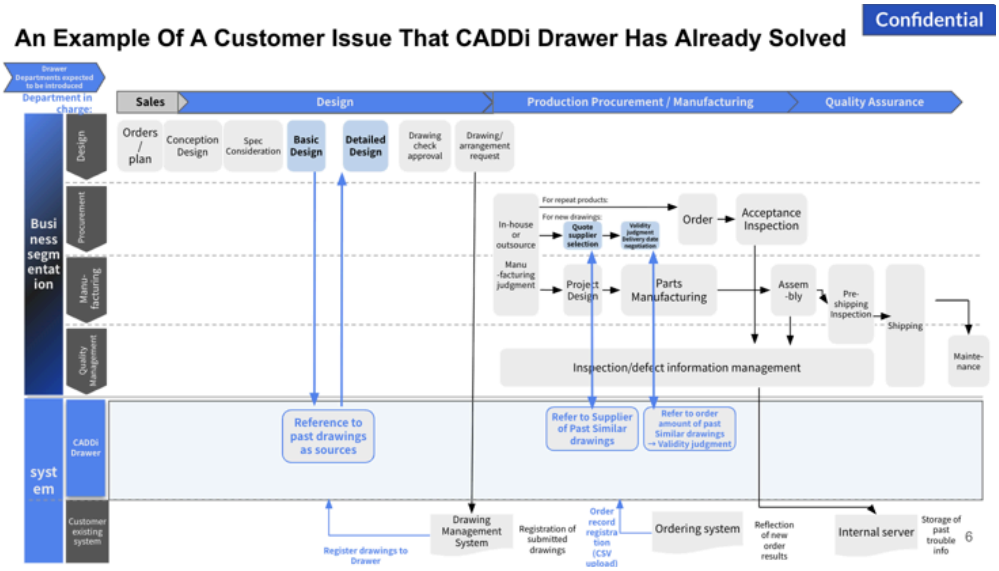
Part 1: CADDi Drawer Customer Use Case Discovery

Below you can find an example of a workflow diagram for an industrial equipment manufacturer. Based on this workflow diagram, please consider customer issues that Drawer can solve in the future and how to solve them.



Additionally, you can find an example of an issue that Drawer has already solved.

- Please make a comprehensive proposal on use cases for Drawer's current functions, new functions/products, and solutions.
- Please identify anticipated issues and then make a proposal in order of priority.



Part 2: Identify what a customer needs, build a working prototype, and demo it in a live interview.

You are the Solutions Professional. You decide what the customer needs and how to solve it.

Time Investment: ~3 hours
Required Deliverables: Working implementation + 30-60 mins interview

The Scenario

Hoth Industries manufactures air handling and cooling products for data centers. You just completed a discovery call with their team. They urgently need help and are asking for many things.

Your job:

1. Take a look into supply chain raw data prepared by Hoth, identify their issues and decide what they need
2. Build a working prototype that solves a real problem
3. Demo it like you're presenting back to them for feedback

What We Provide

Sample data files we provide: ([shared via download](#))

- `supplier_orders.csv` - 500 rows of order history (messy supplier names, missing dates)
- `quality_inspections.csv` - 200 rows of quality/rejection data
- `rfq_responses.csv` - 100 rows of supplier quotes and pricing

Use this real data in your prototype.

Submission

Submit your work (email chris_cope@caddi.com) a few hours before your interview.
